| Goldstein giving speech on the developments of the African Front

After the current developments in the African front Goldstein condemns the Party.

Oceania has recently been victorious in the African front, whether this is true is still to be determined by officials of the Rebellion.

According to Ingsoc due to “vast strategic manoeuvre,” and “perfect co-ordination,” the armies of Oceania were able to “control of the whole of Africa,” which brings “the war within measurable distance of its end.”

With these developments the great rebel leader Emmanuel Goldstein has made a speech to inform the rebels against Ingsoc on what their next tasks are and on the reality of the war.

The speech was made from a secret location within Airstrip One, for the safety of the leader the location has been kept secret to all.

“There is no genuine proof that there was any victory in Africa, conditions are terrible as always and very clearly the Party of Ingsoc is undergoing an imperialistic policy, which they themselves condemn in their teachings,” stated Goldstein.

With the statements of Goldstein, leaders within the rebellion have begun to question the reality of the so-called war against the constantly changing nation, either Eastasia or Eurasia.

These leaders have sent out spies within the frontlines to determine whether there are really wars going on or whether they are another lie made by the Party.

It is impossible to know whether Oceania is at war, therefore it is vital that the rebellion continues, to discover the truth and to bring back the old way of life.

As stated by Goldstein in his latest speech "we must all play our part in the rebellion against the terrible Party," he continued by giving the orders for this month, which are to "sabotage the Ministries when at work, find information in the prole quarters and write it down in old diaries that can be found in stores within the prole quarters."

The orders are a vital part of the rebellion, as they show to the Party that there is and forever will be resistance, that their regime will not last forever, that humankind will return.

"It is vital that the diaries that will contain information on the old world are to be dropped off in the dustbin outside these stores of the prole quarters, their leaders of the rebellion will find them and add them to the collection," continued Goldstein.

As usual, Goldstein will be holding another speech halfway through the month to inform us the rebels on the reality of the situation in Oceania and what must be done.
